

About BioMedical

Your Senior Team

Dr James Densem
Managing Director

James established BioMedical Computing Ltd in 1996.

Adrian Davis
Senior Software Developer,
Contracts Manager

Simon Mumford
Senior Software Developer,
Server Administrator

If you are looking for bespoke software development services that really deliver what you want, and you don't want to pay over the odds, then BioMedical is the right team for you.

We will turn your vision into reality

Whether that is more efficient working processes or configuration software (that enhances your product's functionality and commercial value) we can help.

The senior team looking after you have over 50 years of combined experience in delivering bespoke software applications to the exact requirements of businesses like yours.

You will not be disappointed

Our business is growing because we do not let our customers down and we are regularly recommended. Part of the secret of our success is retaining a solid core team of exceptionally talented people that carry out all your development work in house. In addition, we always start by understanding what your final goal is and work back from there. This ensures that the solution always meets your required result.

As our name suggests, we have extensive experience serving medical research, biotechnology and scientific clients. However, we are also well established in providing commercial solutions for customers in publishing, insurance, electronics, construction, manufacturing, care and retail.

Based in East Sussex, our clients are both local and national, large and small. Some of them work internationally, but **no project is too large or too small for us.**

You can find case studies and lots more about us and the way we work on our website www.bio-medical.co.uk.

We are based in the Innovation Centre, Highfield Drive, St Leonards On Sea, East Sussex, TN38 9UH.

Why do businesses use us?

- We are highly recommended
